

DRAFT BEER DISPENSER

Perfectly poured beer at the touch of a button

Our Automatic Dual Tap Beer Dispenser with a foaming mechanism. The hands-free portion control allows a preset quantity of chilled draft beer and foam to be served. Always at the perfect temperature and with just the right amount of foam.

Creamy Foaming Tap

Our beer tap has separate nozzles for dispensing beer and beer foam. The creamy foaming is designed to dispense the ultimate creamy beer foam. It keeps the CO₂ gas in the beer to keep freshness and reduces the bitter taste of beer.

Functional Features

1. Press once to dispense.
2. Tilt-pouring to ensure perfectly poured beer.
3. Portion size can be pre-set to pour same quantity every time. No overflow of beer.
4. Amount of foam can be set and adjusted for both taps individually.
5. Ambient temperature beer is cooled down as it flows through the beer circuits.
6. Two beer circuits allow two different types of beer can be connected and poured simultaneously.
7. The display shows the number of beers poured.
8. Switchable automatic or manual dispense mode.
9. Empty-Keg-Alert
10. Adjustable platform to accommodate two different glass heights. Medium glasses Size: 135-200mm. Large glasses size: 155-240mm

DBF-AS65WE-T

MODEL	DBF-AS65WE-T
Refrigeration System	Instant Cooling System
Dispensing Capacity	65L (30°C - > 8°C / 4hr)
Outside Dimension	367mm (W) x 674mm (D) x 764mm (H)
Power Supply	1 Phase 220 - 240V 50/60 Hz
Electric consumption	Rated Motor: 285/345W
Ice Storage Time	Approx 10hr (Initial Cooling Water Temperature 25°C)
Weight	50kg (Net weight)
Operate Condition	Ambient temperature 5 - 32°C

Remarks:

Operating Conditions: • Test Ambient Temperature 5°C - 32°C • AC Supply Voltage: 1/220-240V / 50Hz
