HOSHIZAKI

1. Install the product properly in accordance with the instructions on location, water supply/drain connections and electrical connections stated in the instruction manual provided. Allow 10mm extra space at the installation site to meet any installation requirements (additional spacing is also required for proper air flow and pipe connections).

2. A water purifier, if used, must be installed within operating water pressure (primary water pressure)

3. If the water hardness exceeds 90ppm, installation of a water softener is recommended to prevent reduction in component service life.

4. The tank water temperature setting is different from

5. The door stops to open at 100° or more and closes automatically at less than 100°.
